

# BUSINESS CONTINUITY AND DISASTER RECOVERY PLAN

As the commodities market being high volatile, fast moving and sensitive in nature, there need to have adequate risk control and disaster recovery plan:

All the data backed up as per the Backup and Archival system are stored in computer system, USB Hard Drive and on CD ROM (periodically). Servers including Switch and Router are kept in fire proof cabinet (rack). Moreover, backup drives are kept at a different location (e.g. HO).

## · Disaster Recovery Plan

-In situations like, power cuts there are sufficient UPS systems

-The office premise is on the prime location on a main road and being at the heart of the city, it's near to police station, hospitals and Fire Brigade.

-Moreover, there has been Stock Brokers Indemnity Insurance Policy from the New India Assurance Co. Ltd for MCX operations.

-For SOS purpose, we have alternate connectivity which linked with the HO through Internet link.
